

11. BIBLIOGRAPHY

This bibliography lists the relevant academic and popular literature amassed for this project. Paper copies, or their abstract, of many of the documents have been obtained, as noted in each case. In other cases, where the material was seen, a brief annotation accompanies the citation. This generally includes the library location of the original source and the call number, as follows: WLU (Wilfred Laurier University); UW (Waterloo University); U of G (University of Guelph); Agricola (an on-line catalogue of the United States Department of Agriculture library) etc. A much more extensive literature list has been graciously provided by Paul Smith, of OMAFRA in CD form. A partial list of relevant titles from this source has been extracted and is held separately from this bibliography.

This bibliography is divided into the following sections for ease of use and retrieval:

- Theory and Methodology
- Applications, Policy and Case Study
- Internet Resources
